DETAILED ACTION

1. This Office action is in response to the communication filed on 7/10/09.

Response to Arguments

2. Applicant's arguments filed 7/10/09, with respect to the 35 USC 112, first paragraph rejections have been fully considered and are persuasive. The rejections have been withdrawn.

Specification

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required:

The written portion of the specification is silent with regards to the following limitation: "wherein, when the embolic protection filter is collapsed in part within the distal sheath, a portion of the guidewire within the second lumen of the elongated tubular member adjacent the distal port of the second lumen is generally coplanar with a portion of the guidewire within the guidewire lumen of the guide tip, a portion of the elongated wire within the first lumen of the elongated tubular member adjacent the distal end of the first lumen, and the point of attachment of the elongated wire to the guide tip." (emphasis added).

Though there is support for the claim limitation in the drawings, the written portion of the specification must also provide antecedent basis for terminology/limitations used in the claims. The applicant is required to amend the

specification to provide support for the structural elements being generally coplanar with other.

Election/Restrictions

4. Claims 1-18, 22-28, 31-37 and 44-46 are allowable. The restriction requirement between the different species, as set forth in the Office action mailed on 7/12/07, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 17-21, directed to a non-elected specie, are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

5. This application is in condition for allowance except for the presence of claims 38-43 directed to an invention non-elected without traverse. Accordingly, claims 38-43 must be cancelled in response to this Office action.

Conclusion

6. This application is in condition for allowance except for the preceding formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
